Skills

React

JavaScript

HTML

CSS/ SCSS

GIT

Languages

Intermediate english proficiency

I learning Javascript and the React library for over a year. I like programming, I want to develop myself and I feel that this is the path I want to follow. My professional experience learned me to talk to clients and understand their needs. Being abroad, I learned to work as a team in an international environment. I know that as a programmer, I will also be able to complete the tasks entrusted to me and be part of the team.
